GOVERNANCE FINGERPRINT ENGINE

PRE-TRADE SEAL

Aureon seals the decision environment through stack audit, doctrine lineage, authority hash, and compliance artifact linkage so a governance package can be reconstructed later.

EQUITIES PRE-TRADE GOVERNANCE DASHBOARD

approve before version increments.

✓ Force doctrine update proposal

✗ Cannot self-approve — always requires Tier 1

3 Thifur Telemetry

Signals doctrine gaps via execution telemetry. Read-only — surfaces recommendations to Tier 1. Zero self-modification.

✓ Signal doctrine gaps · Confirm lineage integrity

✗ Cannot modify doctrine under any condition
