GOVERNANCE FINGERPRINT ENGINE

PRE-TRADE SEAL

Aureon seals the decision environment through stack audit, doctrine lineage, authority hash, and compliance artifact linkage so a governance package can be reconstructed later.

EQUITIES PRE-TRADE GOVERNANCE DASHBOARD

2 **Regulatory Mandate**
Rules (SEC, DORA, MiFID II) absorbed by LLM. Creates pending update — Tier 1 must approve before version increments.
✓ Force doctrine update proposal
✗ Cannot self-approve — always requires Tier 1

3 **Thifur Telemetry**
Signals doctrine gaps via execution telemetry. Read-only — surfaces recommendations to Tier 1. Zero self-modification.
✓ Signal doctrine gaps · Confirm lineage integrity
✗ Cannot modify doctrine under any condition
